

ABOUT US

**Your Patient.
Our Priority.
Every Time.**

Kirkland Specialty Infusion Center is a physician-led outpatient infusion suite affiliated with Evergreen Rheumatology — one of the Pacific Northwest's most respected rheumatology practices, with over 20 years of specialty care experience.

We built this center for one reason: to give your patients a better infusion experience while making your job easier. We handle prior authorizations, financial barriers, pre-infusion preparation, and follow-up coordination — and we keep you informed every step of the way.

What makes us different? A physician or licensed provider is present during every single infusion. Not on call. Not nearby. Present. That level of clinical oversight is rare in outpatient infusion — and it is our standard.

SPECIALTIES SERVED

*The Infusion Partner Your
Patients Deserve*

Kirkland Specialty Infusion Center

KIRKLAND, WASHINGTON

*"Physician-supervised infusions.
Financial advocacy for every patient.
Seamless communication
back to your office."*

OUR PROCESS

Seamless From Referral to Follow-Up

1

Referral & Intake

We receive your referral, verify insurance, and schedule patients promptly at their earliest convenience.

2

Prior Authorization

Our team handles the full prior authorization process — including documentation, peer-to-peer support, and appeals — minimizing work for your office.

3

Financial Advocacy

We help patients access copay assistance, support programs, and grants to reduce financial barriers to care.

4

Pre-Infusion Safety Review

We coordinate with referring providers to confirm labs, DEXA results (when needed), and clinical baselines to help avoid treatment delays.

5

Infusion Day

Patients receive care in a calm, private setting with licensed medical staff available for clinical guidance and medication questions.

6

Follow-Up & Compliance

We schedule future infusions and send reminders to support adherence and treatment continuity.

FOR REFERRING PHYSICIANS

Why Send Your Patients Here?

A Physician Is Always Present

Every infusion is supervised by a physician or licensed provider — on-site, in real time. Most infusion centers cannot say this. Your patient is never in a chair without clinical oversight. That is your peace of mind and theirs.

We Close the Loop With You

We communicate back to your office after every infusion — so you always know your patient received their medication, tolerated it well, and is scheduled for their next dose.

We Handle Everything Your Office Shouldn't Have To

Prior authorizations, peer-to-peer reviews, copay cards, patient assistance programs, grant applications — our team manages it all. Your staff sends the referral. We do the rest.

Patients Arrive Prepared

We confirm labs, coordinate DEXA scans where indicated, and screen for any health changes before infusion day. No last-minute surprises, no delays, no wasted chair time.

We Keep Patients on Schedule

We book follow-up appointments before the patient leaves and send reminders to ensure compliance — protecting your treatment plan and improving your outcomes data.

**ONE REFERRAL. ZERO HASSLE.
YOUR PATIENT IS IN EXPERT HANDS.**

We look forward to welcoming your referrals!
